Except for the following items, the Group believes that the adoption of the above IFRSs would not have any material impact on its financial position and financial performance, and will disclose the relevant impact when the assessment is completed:

1. IFRS 9 “Financial Instruments”

   1) Classification- Financial assets

      IFRS 9 contains a new classification and measurement approach for financial assets that reflects the business model in which assets are managed and their cash flow classified. IFRS 9 contains three principal classification categories for financial assets: measured at amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL). The standard eliminates the existing IAS 39 categories of held to maturity, loans and receivables and available for sale.

      In addition, IAS 39 has an exception to the measurement requirements for investments in unquoted equity instruments that do not have a quoted market price in an active market and for which the fair value cannot be measured reliably. Such financial instruments are measured at cost. IFRS 9 removes this exception, requiring all equity investments to be measured at fair value.

   2) Impairment-Financial assets and contact assets

      IFRS 9 replaces the ‘incurred loss’ model in IAS 39 with a forward-looking ‘expected credit loss’ (ECL) model. This will require considerable judgment as to how changes in economic factors affect ECLs, which will be determined on a probability-weighted basis. Lifetime ECL measurement applies if the credit risk of a financial asset at the reporting date has increased significantly since its initial recognition; otherwise, the 12-month ECL measurement shall be applied.

   3) Transition

      Financial instruments that have been derecognized prior to the effective date of IFRS 9 cannot be reversed. Under IFRS 9, the requirements for classification, measurement and impairment of financial assets are applied retrospectively with the difference between the previous carrying amount and the carrying amount at the date of initial application recognized in the current period. Restatement of prior periods is not required.

2. IFRS 15 Revenue from Contracts with Customers

   IFRS 15 establishes a comprehensive framework for determining whether how much and when revenue is recognized. It replaces the existing revenue recognition guidance, including IAS 18 “Revenue” and IAS 11 “Construction Contracts”. IFRS 15 and its related amendments require that when another party is involved in providing goods or services to a customer, the principal controls the specified goods or services before they are transferred to a customer. Otherwise, the Group is assumed as the agent.

The Group is a principal if it obtains control of any one of the following:

1) The good or another asset that it then transfers to the customer.

2) The right ot a service to be performed by other party, which gives the Group the ability to direct that party to provide the service to the customer on its behalf.

3) The good or service from the other party that it then combines with the other goods or services in providing the specified good or service to the customer.

Indicators to support the Group's assessment of whether it controls a specified good or service include, but are not limited to, the following:

1) The Group is primarily responsible for fulfilling the promise to provide the specified good or service.

2) The Group has inventory risk before or after the specified good or service is transferred to the customer.

3) The Group has discretion in establishing the price of the specified good or service.

When IFRS 15 becomes effective, the Group may elect to apply this Standard either retrospectively to each period presented or to recognize the accumulated adjustment at the date of initial application.

(c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

As of the date the following IFRSs that have been issued by the IASB, but not yet endorsed by the FSC:

New, Revised or Amended Standards and Interpretations	Effective date per IASB
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"	Effective date to be determined by IASB
IFRS 16 "Leases"	January 1, 2019
IFRS 17 "Insurance Contracts"	January 1, 2021
IFRIC 23 "Uncertainty over Income Tax Treatments"	January 1, 2019

Those which may be relevant to the Group are set out below:

Issuance / Release Dates	Standards or Interpretations	Content of amendment
January 13, 2016	IFRS 16 “Leases”	The new standard of accounting for lease is amended as follows: • For a contract that is, or contains, a lease, the lessee shall recognize a right of use asset and a lease liability in the balance sheet. In the statement of profit or loss and other comprehensive income, a lessee shall present interest expense on the lease liability separately from the depreciation charge for the right of-use asset during the lease term. • A lessor classifies a lease as either a finance lease or an operating lease, and therefore, the accounting remains similar to IAS 17.

The Group is evaluating the impact on its consolidated financial position and consolidated financial performance upon the initial adoption of the abovementioned standards or interpretations. The results thereof will be disclosed when the Group completes its evaluation.
